
12:38 WALL run — survey camera versus wheel odometry
Relative comparison; clock, mounting and alignment uncertainty remain
Trajectories: early-departure alignment only
Wheel centre
Phone, configured lens offset
Phone camera, no offset
Initial robot left Y (m)
Initial robot forward X (m)
Position disagreement (not absolute error)
ΔX
ΔY
Planar separation
iPhone minus wheel (mm)
Time after first normal phone frame (s)
Heading change disagreement, initial offset removed
iPhone minus wheel heading (degrees)
Time (s)
Commanded speed versus encoders
left command (faint = encoder speed)
right command (faint = encoder speed)
Wheel speed (mm/s)
Time (s)
